

The Catalyst Grants Program

Amendment

September 30, 2026

This amendment updates the TRISH priorities outlined in Section D.

This amendment establishes that the solicitation is limited to projects with a period of performance not exceeding 12 months. Proposals involving in-flight research are not eligible for consideration.

This amendment also introduces new requirements for the Biographical Sketch and Current and Pending Support. The updated forms include a research security training certification. See Grant Information Circular (GIC) 26-02, *Research Security Training Requirements*, for additional information. TRISH will only accept the NASA-specific forms developed through SciENCv; Word-based forms are no longer accepted.
